---

**Freelance Web Developer at Creative Circle**

From March 2014 to present day.

**Contracts Actively involved in:**

- **The Morrison Agency:** This was a 6 week contract to complete a Drupal based intranet portal. I was responsible for the frontend and the backend development of this website.
- **Fitzgerald & Co:** This was initially a 3 week long contract to analyze their current system and advise them on future steps for krystal.com. The site was built in expression engine, and it was my responsibility to enhance the current system and make front end tweaks. This contract has now turned into an indefinite one with no end date due to my skillset.
- **The Kellen Company:** During this contract I have been responsible for backend and frontend developer on projects using PHP within the wordpress framework, psd to html, angularjs with grunt, and interactive document production.

**Software Developer at Raban Development**

From January 2012 to present day.

Raban Development understands the Web development cycle. We have a process that works. We spend time understanding your business, its goals, current and future direction and where the Web fits into that plan. From there, we work with you to develop a Web site that is customized to meet your specific business objectives.

**Contracts actively involved in:**

- **USA Pools:** This was a 3 week long contract to help them debug their system which was based in codeingiter. I successfully set up bugtracking of over 1,000 bugs throughout their system and advised them on how to stop database errors and PHP errors across their user interface.
- **DeepBlue:** I was brought into this contract for an indefinite amount of time. This contract was mostly frontend development of websites in bootstrap and foundation 5 frameworks. I was also responsible for the PHP development in expression engine for one of their clients, Garland Science.

**Responsibilities:**

Frontend Development over multiple frameworks including Bootstrap, Foundation 5, and UI Kit using HTML5 and CSS3

Backend Development in frameworks such as CodeIgniter, Expression Engine, Drupal, and Wordpress using PHP

Magento and Wordpress E-Commerce Websites & Solutions

Unix Administration

Producing prototypes from Photoshop and Sketch App wireframes

Solution Implementation
